PROFESSIONAL SUMMARY

Full Stack Developer with 3 years of experience designing and building scalable, secure, and high-performance enterprise applications. Strong expertise in Java, Spring, RESTful APIs, and modern frontend frameworks. Known for end-to-end ownership, strong collaboration with business teams, and delivering high-quality, production-ready solutions.

CORE SKILLS

Programming Languages: Java, Python, TypeScript, JavaScript, SQL, C++, HTML, CSS

Backend Technologies: Spring Boot, Hibernate, JPA, Spring MVC, Spring Security, API Design, Microservices Architecture, Maven, Node.js, REST, SOAP, Multithreading, JDBC, SDLC, Spring Data, JWT, Secure Login, Kafka

Frontend Technologies: React 18, Angular, Material UI, Vite

Databases: PostgreSQL, MySQL, MongoDB, NoSQL

DevOps & Cloud: Git, Docker, CI/CD Pipelines, AWS (S3, RDS)

Other: Agile/Scrum, System Design, Performance Optimization, Linux, Multi-Tenant Management, Authentication Systems, ERP.

PROFESSIONAL EXPERIENCE

Contract Full Stack Developer

Ishavx technology | April 2026 - Present | Remote

- Spearheaded end-to-end development of the entire backend system, including solution architecture and database schema design, and delivered VendorInfra, a B2B vendor/contractor management platform for the Indian construction & infrastructure sector.
- Independently managed AWS infrastructure (S3, RDS) for deployment.

Solution Analyst (Full Stack Developer)

Argusoft | Jan 2023 – May 2026 | Gandhinagar

- Developed an HMS used by clinics across Gujarat to digitize regional clinical workflows.
 - Managed millions of public medical records with a focus on high-throughput data integrity.
 - Applied AI-Assisted Development with AntigraVity, resulting in 30% better performance.
 - Reduced server response times by 35% and query execution by 40% via PostgreSQL optimization.
 - Mentored and led a 3-member team through rigorous code reviews and best-practice sharing.
-

PROJECTS

AROG – Full Stack Health Management System [\[Link\]](#)

- **Project Description:** Architected a comprehensive, ABDM-compliant Health Management System designed to digitize clinical workflows and hospital operations. The platform integrates real-time telemedicine and secure EHR management to ensure interoperability within the Indian healthcare ecosystem.

Medplat – National Health Data Platform [\[Link\]](#)

- **Project Description:** Developed a centralized national-scale platform for the secure storage and retrieval of millions of public medical records. This public infrastructure project enables government agencies and healthcare providers to access synchronized health data while maintaining strict security standards.

VendorInfra – B2B Vendor/Contractor Management Platform

- **Project Description:** A B2B platform for the Indian construction sector, enabling companies to manage projects, find/rate vendors, and handle procurement, while allowing vendors to create profiles and respond to proposals.
-

EDUCATION

Bachelor of Technology (B.Tech) – Computer Science

Gandhi Institute for Technological Advancement, Bhubaneswar | 2019-2023

Senior Secondary (12th Standard) - Science

Jawahar Vidya Mandir, Shyamali, Ranchi (CBSE) | 2019

CERTIFICATE & ACHIEVEMENTS

- **The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert**, Udemy [\[Link\]](#)
- **MongoDB - The Complete Developer's Guide 2023**, Udemy [\[Link\]](#)
- Solved 200+ LeetCode problems focusing on **Data Structures and Algorithms** in Java, including Dynamic Programming and Graph theory.
